From the lodge the footpath veers off to the right and through a small gate. Go through the gate opposite and continue along the track until you meet the road.
OS Grid Reference	Description of location	Dist. from start	Description of route to next check point

Opposite is a car park where there’s a public toilet . Follow this path along and shortly round to the left, and then through a rotating gate (The Canon Kissing Gate). Continue along the lower path through the park. Through the park past the white lodge on your right until you get to the bridge – which is level with the main house up to your left.
257 702	Road bridge in Chatsworth Park	17.4	Cross the bridge here so that the river now runs on your left, and immediately turn left cutting back onto the grass. Follow a vague track heading between the river on your left and the road on your right. 258 681	Stile over stone wall	18.9	Continue along the footpath, muddy, with a stone wall on your left, and the woods up to your right. A little later over a stile, and then angle down to the left following a muddy track now. Carry along the broad muddy track for another 1km or so, and slowly the sides taper in so that the river is close to your left and the stone wall is close on your right. See the footpath heading over a stile to your right.
260 667	Footpath to Rowsley		Follow this muddy path with the river on your left until you come to a railway bridge – continue underneath this and into Rowsley (Holme Farm opposite). The track joins a small road here.

(Opposite Holme Farm Cottage). Go along the footpath and cross through two sets of narrow stone stiles past a cottage on your left followed by a smelly farm also on your left. 217 653	Path meets track to a farm	23.1	At the top of the hill is a big hay barn on your left – LOTS of mud and cow poo to your front - through the stile and follow the sign for the bridle road to Youlgreave – down the hill. 100m down do a left turn through the iron gate – go down and along the footpath, zigzagging down to the river. Over this and up the track / road all the way to the top to the T junction. Do a left turn heading to the church with a tower. At the church, turn left and pass the pub on your left. Down hill about 100m to the scout hut – a newish building on your right just after the primary school, opposite the UK Petroleum Garage. Through a double set of metal gates, set back 10m from the road, single storey building with an angular roof.
213 643	Scout hut in Youlgreave	24.1	Head out of here, turn left retracing your last footsteps, with a right turn just after the pub and then continue down, down, down the hill right to the end, where you do a right turn, and then cross back over the river. (25 miles is now done!) Immediately then on your left you will see a signposted footpath, (and also a sign that says "no parking, emergency access only"). Continue along this road, and then about 100m after the Youlgreave turn (on your right) at the top of the hill, you will see a footpath signposted to your right. Take this down the hill, and then only about 5 m along turning right again through a stone squeeze stile and head diagonally left down the hill. 50m on is the next stile – carry on over that, gaining the lower ground. Continue down hill with the stone wall on your left until you come to the road once again at the bottom.

Ok, head along this now for about 3.5 miles. Don’t worry: you will be met as can be arranged with your support driver. Before you leave the trail you will come to one last old railway station with its platform on your left. It was the station for Great Longstone. This is preceded by a sign warning cyclists that there is no further access. Also on your left you may see a sign for the Station House B&B.
OS Grid Reference	Description of location		Description of route to next check point
193 712	Leave the Monsal Trail: knee level sign telling you no further access.	32.5	As you leave the station area, you will pass underneath one more bridge, and then about 100m later two footpaths. One to your left for Ashford (ignore this) but take the next path on your right a few meters later. Follow this with the wall on your left, through a gate less than 100m on. The wall now angles off to the left, you carry straight on. A good 100m later, through another gate, grassy hill up to your right, you continue to the road directly ahead.

292 844	Clough Lane		Turn right along this road, and then about 400m later you will meet another minor road, continue along this to the end where you do a left turn down and then a quick right turn back onto the foot path, so that the river is running closely now on your left.
298 848	Road, stream, path on right		About 300m later you come to a large muddy pond. Follow this round on its left side, and then the path goes down a short slope on its far side through a hedge, to bring you out by a café on the left. Walk on: resist the temptation to go on the swings to your left, or down the slide! At the road follow this down to the left, and take the footpath on the right that is nearest to the river, so that you walk with the river on your left. Carry on now for about 0.5 mile until you hit the road again, keeping the river on your left. When you get to the road, cross over and pick up the path now in the same direction, but so that the river is on your right. About 250m later, you cross a road again, and pick up the path in the same direction, but so that the river is now on your left again. The park is opening up now, with a wooded hill up to your right, and the river on your left. Follow along to the end where you will come to a mini-roundabout. Right turn and a quick left turn back into the park. Follow on past a duck pond on your right, down past another pond on your left. Continue on and the main green will be on your right. Continue on in this same direction, ignoring any paths that lead off left or right, until eventually you come to a roundabout, street lights, and drunken students walking home in the early hours..
